WE ARE:

The MobilPlus brand incorporates the best available lubricant technologies into market-ready products with the aim of taking premium lubricants directly to consumers worldwide. For over 15 years, the Team of Highly decorated professionals have developed unique formulas and advanced production technologies for private label lubricants. Today, these learned technological and processing advancements are utilized to manufacture MobilPlus, a complete lubrication product line with outstanding performance and benefits compared With other brands

WE OFFER:

MobilPlus is dedicated to contribute top-quality lubricants. We work constantly on refining our formulas through lubricant technology & innovation. Our products meet or exceed the requirements essential to promote increased durability, efficiency and wear reduction, thereby decreasing operating costs through tribological progressions

A PROMISE WE STAND BY

Our solutions are largely based on our own formulations, which are permanently tested and adapted to current technical circumstances wherever necessary. The best raw materials, compliance with the highest specifications and a complete testing process– from raw material delivery to production and delivery ensure the highest level of safety and quality.

Our vigorous infrastructure is designed to meet our clients most stringent demands. It allows for tight quality controls, great service reliability & competitive economies. state-of-the-art, full-service lab ensures reliable quality & performance for all our products.

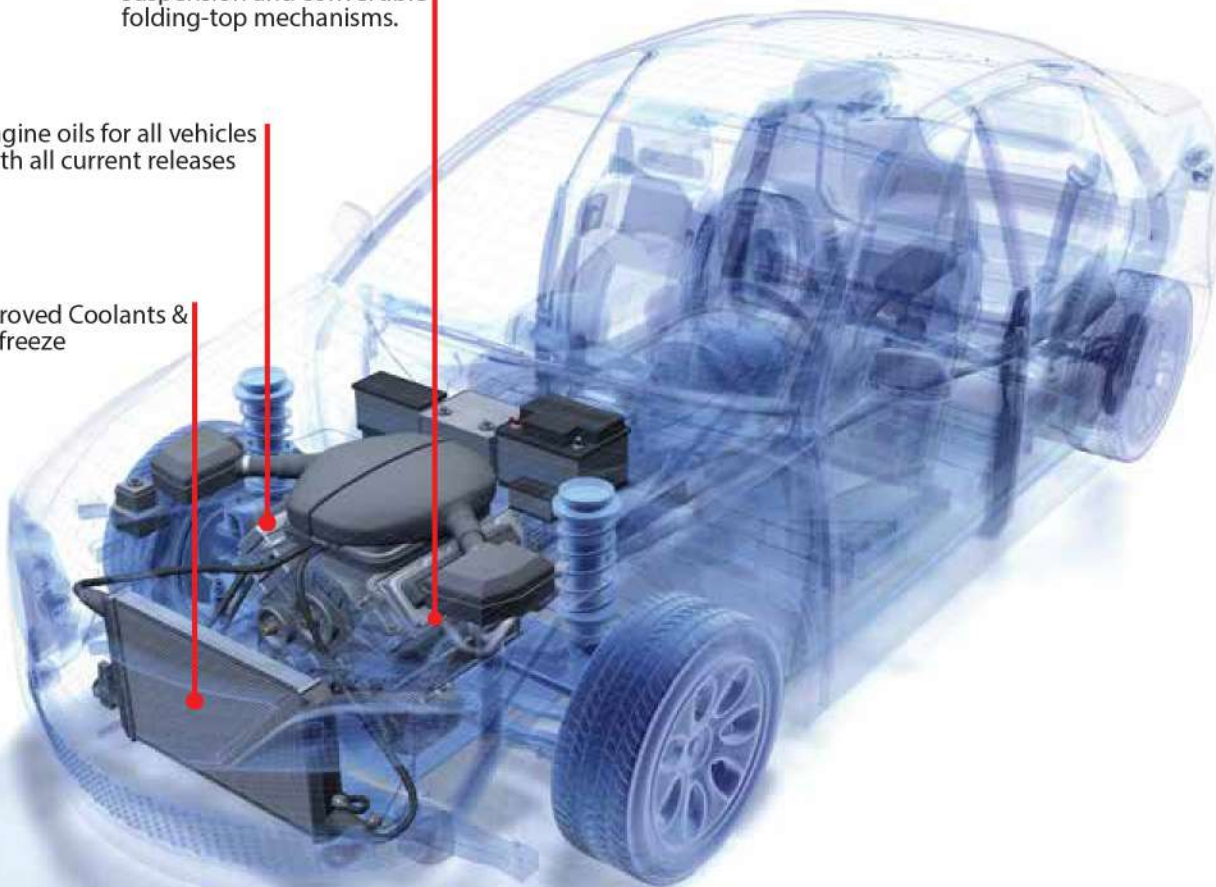

- Products licensed under API & ILSAC performance standards
- Premium base oils & additives
- Strict quality assurance control
- Quarts, gallons, pails, drums, totes and bulk tankers available

Hydraulic oils for servo steering, hydropneumatic suspension and convertible folding-top mechanisms.

Engine oils for all vehicles with all current releases

Approved Coolants & Antifreeze
